

## Practice Practicals for First Responder

The practical examination for First Responder consists of 12 skills stations consisting of both skill-based and scenario-based testing.

The candidate will be tested individually in each station and will be expected to direct the actions of any assistant First Responders who may be present in the station. The candidate should pass or fail the examination based solely on his/her actions and decisions. **80%** required per skill. **90%** required for finals.
